Volume 283 1994

Contents

Letters to the Editor

Gamma-ray spectroscopy of the interstellar medium in the Orion complex
Bykov A., Bloemen H. L1

SHARP images of the pre-main sequence star V 536 Aquilae: a highly polarized binary
Ageorges N., Ménard F., Monin J.-L., Eckart A. L5

UV variability of IRAS 13224–3809, a rapidly X-ray variable far-infrared luminous galaxy
Mas-Hesse J.M., Rodríguez-Pascual P.M., Sanz Fernández de Córdoba L., Boller T. L9

Maximum-entropy maps of the Be shell star ζ Tauri from optical long-baseline interferometry
Quirrenbach A., Buscher D.F., Mozurkewich D., Hummel C.A., Armstrong J.T. L13

A liquid adaptive mirror
Ragazzoni R., Marchetti E. L17

Diffuse X-ray emission from the supergiant shell LMC 4 detected with ROSAT
Bomans D.J., Dennerl K., Kürster M. L21

CO and C I observations of shock-excited gas in IC 443C
White G.J. L25

Astrometry in the Galactic Center region
Müller T., Rosa M.R., Röser S. L29

Cosmology

Fragmenting the Universe. III. The construction and statistics of 3-D Voronoi tessellations
van de Weygaert R. 361

Apparently periodic Universe
Busarello G., Capozziello S., de Ritis R., Longo G., Rifatto A., Rubano C., Scudellaro P. 717

Extragalactic astronomy

The nature of elongated ellipticals
Nieto J.-L., Poulain P., Davoust E. 1

Multifrequency windows on spiral galaxies. III. Internal extinction at optical and near-infrared wavelengths
Boselli A., Gavazzi G. 12

CO versus H I in the Tully-Fisher relation for a sample of 32 galaxies
Schöniger F., Sofue Y. 21

(RN) Oxygen abundances in the Large Magellanic Cloud: a prediction of SN II/SN I rates
Barbuy B., de Freitas Pacheco J.A., Castro S. 32

Detection of intracluster light in the rich clusters of galaxies Abell 2390 and Cl 1613+31
Vílchez-Gómez R., Pelló R., Sanahuja B. 37

Brightness temperatures and viewing angles for extragalactic radio sources: a test of unification schemes for active galactic nuclei
Teräsranta H., Valtaoja E. 51

Deep CO observations of dominant cluster galaxies with reported cooling flows
Braine J., Dupraz C. 407

Percolation and synchrotron emission. III. Interaction between galaxies in two dimensions
Zaninetti L. 417

The odd group of galaxies around NGC 1400/1407
Quintana H., Fouqué P., Way M.J. 722

A high-frequency radio continuum investigation of giant radio galaxies. I. Observations of six objects at 2.8 cm wavelength
Klein U., Mack K.-H., Strom R., Wielebinski R., Achatz U. 729

Extraction of the mean radial mass distribution in clusters of galaxies by observations of weak gravitational imaging
Breimer T.G. 745

CCD imaging of NGC 4861: morphology and brightness distribution
Dottori H., Cepa J., Vilchez J., Barth C.S. 753

C IV QSO absorption systems and properties of galactic haloes at high redshift
Petitjean P., Bergeron J. 759

(RN) Quantitative morphology of E–S0 galaxies. II. Possible environmental effects on the properties of lenticulars
Michard R., Marchal J. 779

Kinematic properties of anisotropic models of spherical galaxies
Hiotelis N. 783

Warm IRAS sources from the Point Source Catalog. III. Emission-line properties, correlations, and AGN unified models
Keel W.C., de Grijp M.H.K., Miley G.K., Zheng W. 791

(RN) Redshift and nature of two BL Lacertae objects: PKS 0306+102 and S3 0503–04
Véron P. 802

Galactic structure and dynamics

Collisional relaxation in a nonintegrable potential
Kandrup H.E., Willmes D.E. 59

Integrated spectral properties of star clusters in the near-ultraviolet
Bica E., Alloin D., Schmitt H.R. 805

Stellar clusters and associations

The globular cluster NGC 6540
Bica E., Ortolani S., Barbuy B. 67

A comparison of methods for determining the centers of globular clusters
Picard A., Johnston H.M. 76

Wide area colour magnitude diagrams of the LMC cluster NGC 2214
Bhatia R., Piotto G. 424

Formation, structure and evolution of stars

Interaction of a pulsar with interstellar matter
Istomin Y.N. 85

The optical and near infrared variability of η Carinae: a binary luminous blue variable?
van Genderen A.M., de Groot M.J.H., Thé P.S. 89

The $P-L$ relation for RR Lyrae-like stars with $0.8^d < P < 3^d$
Sandage A., Diethelm R., Tammann G.A. 111

Time-resolved photometry of BN and BU Cancri, two δ Scuti stars in the Praesepe cluster. Fourth photometry campaign of the STEPHI network
Belmonte J.A., Michel E., Álvarez M., Jiang S.Y., Chevreton M., Auvergne M., Liu Y.Y., Goupil M.J., Baglin A., Roca Cortés T., Mangeney A., Dolez N., Valtier J.C., Massacrier G., Sareyan J.P., Schmider F.X., Vidal I. 121

On the sensitivity of Stokes profiles to physical quantities
Ruiz Cobo B., del Toro Iniesta J.C. 129

OB-type binaries: models versus observations
Figueiredo J., De Greve J.P., Hilditch R.W. 144

Lithium and beryllium depletion by rotation-induced mixing in the Sun and in galactic cluster stars
Charbonnel C., Vauclair S., Maeder A., Meynet G., Schaller G. 155

UBVRI polarimetry of AM Herculis-type binaries. V. The asynchronous (?) polar BY Camelopardalis (H0538+608)
Piirola V., Coyne G.V., Takalo S.J.L., Larsson S., Vilhu O. 163

ROSAT soft X-ray observations of the Be/X-ray binary X Persei
Haberl F. 175

Observations from the gamma-ray burst experiment onboard the SROSS-C satellite
Kasturirangan K., Marar T.M.K., Padmini V.N., Prasad N.L., Rao U.R., Seetha S. 435

Spectral eclipse mapping of the accretion disk in the nova-like variable UX Ursae Majoris
Rutten R.G.M., Dhillon V.S., Horne K., Kuulkers E. 441

High speed photometry of PG 1012–029
Ashoka B.N., Seetha S., Marar T.M.K., Kasturirangan K., Rao U.R., Bhattacharyya J.C. 455

Synthetic AGB evolution. III. The influence of different mass-loss laws
Groenewegen M.A.T., de Jong T. 463

A comparison of the power spectra of Z and atoll sources, pulsars and black hole candidates
van der Klis M. 469

A model for the X-ray spectrum of the symbiotic nova RR Telescopii
Jordan S., Mürset U., Werner K. 475

Variability of quiescent and flaring radio emission in RS CVn and Algol-type binary systems
Lefèvre E., Klein K.-L., Lestrade J.-F. 483

WR 40: coherence or chaos?
Matthews J.M., Moffat A.F.J. 493

Locating the emission line regions in polars: Doppler imaging of VV Puppis
Diaz M.P., Steiner J.E. 508

Investigation of the Praesepe cluster. II. Three triple systems: KW 365, 367 and 495
Mermilliod J.-C., Duquennoy A., Mayor M. 515

A spectroscopic analysis of the β Cephei star α Lupi
Mathias P., Aerts C., De Pauw M., Gillet D., Waelkens C. 813

Speckle imaging of T Tauri stars in the L and M near-IR bands
Tessier E., Bouvier J., Lacombe F. 827

Geneva seven-colour photometry and frequency analysis of the δ Scuti star HD 105513
Heynderickx D. 835

Thermal comptonisation in 4U 1700-377
Maisack M., Kendziorra E., Pan H.C., Skinner G.K., Pietsch W., Reppin C., Efremov V., Sunyaev R. 841

Large-scale self-regulation in star-forming systems
Cammerer M., Shchekinov Y. 845

Successive hierarchical fragmentation of centrally condensed protostellar cores
Di G. Sigalotti L. 858

Effect of compressibility on nuclear matter in a neutron star crust
Duorah H.L., Phukon T.C. 867

A long-duration X-ray flare on the RS Canum Venaticorum binary AR Lacertae observed with ROSAT
Ottmann R., Schmitt J.H.M.M. 871

Observation of Hercules X-1 with the ROSAT wide field camera
Rochester G.K., Barnes J., Sidher S., Sumner T.J., Bewick A., Corrigan R., Quenby J.J. 884

The crust screen model for the magnetic field of binary X-ray sources
Zhang C.-M., Wu X.-J., Yang G.-C. 889

Stellar atmospheres

Chromospheric activity in Population II binaries
Pasquini L., Lindgren H. 179

Detection of calcium abundance stratification in Ap stars
Babel J. 189

(RN) Ultraviolet flare activity on the eclipsing binary SZ Piscium
Doyle J.G., Mitrou C.K., Mathioudakis M., Antonopoulou E. 522

Radiation-driven winds of hot luminous stars. XII. A first step towards detailed UV-line diagnostics of O-stars
Pauldrach A.W.A., Kudritzki R.P., Puls J., Butler K., Hunsinger J. 525

Amorphous carbon and silicon carbide grain mixtures in the envelopes of carbon stars
Blanco A., Borghesi A., Fonti S., Orofino V. 561

V 348 Sagittarii: analysis of the [WC 12] stellar spectrum
Leuenhagen U., Hamann W.-R. 567

A submillimeter recombination line maser in MWC 349
Thum C., Matthews H.E., Martín-Pintado J., Serabyn E., Planesas P., Bachiller R. 582

Lithium in RS Canum Venaticorum binaries and related chromospherically active stars. III. Northern RS CVn systems
Randich S., Giampapa M.S., Pallavicini R. 893

Radio emission from magnetic chemically peculiar stars: results of the 1992 VLA survey
Leone F., Trigilio C., Umana G. 908

Elemental abundances in the old open clusters NGC 2243 and Melotte 66
Gratton R.G., Contarini G. 911

High velocity and rapidly variable emission features in the spectra of RS Ophiuchi and CH Cygni
Iijima T., Strafella F., Sabbadin F., Bianchini A. 919

Abundance determination in the CP star 21 Canum Venaticorum by means of spectrum synthesis
Zverko J., Zboril M., Žižňovský J. 932

A spectroscopic analysis of barium stars
Začs L. 937

Diffuse matter in space (including H II regions and planetary nebulae)

The identification of krypton, xenon, and other elements of rows 4, 5, and 6 of the periodic table in the planetary nebula NGC 7027
Péquignot D., Baluteau J.-P. 593

Physical and chemical variations within the W 3 star-forming region. I. SO_2, CH_3OH and H_2CO
Helmich F.P., Jansen D.J., de Graauw T., Groesbeck T.D., van Dishoeck E.F. 626

The X-ray continuum of Tycho's remnant measured with Ginga
Fink H.H., Asaoka I., Brinkmann W., Kawai N., Koyama K. 635

Angular diameters of compact planetary nebulae
Bedding T.R., Zijlstra A.A. 955

H_α interferometric, optical and near IR photometric studies of star forming regions. II. The NGC 7380E/Sh2-142/NGC 7380 complex
Chavarría-K. C., Moreno-Corral M.A., Hernández-Toledo H., Terranegra L., de Lara E. 963

Herbig–Haro objects associated with extremely young sources in L 1527 and L 1448
Eiroa C., Miranda L.F., Anglada G., Estalella R., Torrelles J.M. 973

The Sun

Space and time distribution of hard X-ray emission in a loop at the beginning of a flare
Karlický M., Hénoux J.-C. 202

The evolution of magnetic network elements in the quiet Sun
Liu Y., Zhang H., Ai G., Wang H., Zirin H. 215

Infrared lines as probes of solar magnetic features. VII. On the nature of the Evershed effect in sunspots
Solanki S.K., Montavon C.A.P., Livingston W. 221

The proper motion of network bright points and the heating of the solar corona
Muller R., Roudier T., Vigneau J., Auffret H. 232

Polarimetry and spectroscopy of a simple sunspot. III. Velocity and magnetic field of sunspot umbral dots
Schmidt W., Balthasar H. 241

Seismic study of overshoot at the base of the solar convective envelope
Monteiro M.J.P.F.G., Christensen-Dalsgaard J., Thompson M.J. 247

Variations of properties of the quiet photosphere along the equator and the central meridian: spectroscopic results
Rodríguez Hidalgo I., Collados M., Vázquez M. 263

Magneto-atmospheric waves subject to Newtonian cooling
Bünte M., Bogdan T.J. 642

Time variations of the ^{37}Ar production rate in the chlorine solar neutrino experiment
Gavryusev V., Gavryuseva E. 978

Observations by Ulysses of a pure electron event and its associated type III radio emission of 15 December 1990
Mangeney A., Pick M., Hoang S., Chaizy P., Anderson K., Lanzerotti L.J., Lin R.P., Sarris E.T., Forsyth R., Phillips J.L., Enome S. 982

The solar system

Dynamical evolution of interplanetary dust particles
Marzari F., Vanzani V. 275

Earth-grazing daylight fireball of August 10, 1972
Ceplecha Z. 287

Fractal properties of the interplanetary magnetic field fluctuations: indications of chaotic dynamics
Polygiannakis J.M., Moussas X. 990

Celestial mechanics and astrometry

Discussion relating to the discovery of 2700 double stars *(Text in French)*
Couteau P. 289

Global astrometry of HIPPARCOS double stars within the FAST consortium
Bernstein H.-H. 293

A contribution to the study of fortnightly and monthly zonal tides in UT 1
Schastok J., Soffel M., Ruder H. 650

Construction of the Second Quito Astrolabe Catalogue
Kolesnik Y.B. 997

Physical and chemical processes

Binary black hole in a dense star cluster
Polnarev A.G., Rees M.J. 301

Experimental nuclear masses and the ground state of cold dense matter
Haensel P., Pichon B. 313

Atomic data from the iron project. III. Rate coefficients for electron impact excitation of boron-like ions: Ne VI, Mg VIII, Al IX, Si X, S XII, Ar XIV, Ca XVI and Fe XXII
Zhang H.L., Graziani M., Pradhan A.K. 319

Current sheet formation and dissipation in general *X*-point topologies
Craig I.J.D. 331

The 4s–4p transitions in neutral phosphorus
Biémont E., Martin F., Quinet P., Zeippen C.J. 339

Efficiency of the second-order Fermi acceleration at parallel shock waves
Ostrowski M. 344

Kelvin–Helmholtz instability of hydrodynamic supersonic jets
Bodo G., Massaglia S., Ferrari A., Trussoni E. 655

Turbulent accretion disk dynamos
Torkelsson U., Brandenburg A. 677

Re-analysis of three archival optical objects on Odessa plates
Greiner J., Moskalenko E.I. 693

Beyond the mean-potential approximation in the calculation of thermonuclear reaction rates in dense stars
Sahrling M. 1004

The nonlinear limitation of nonaxisymmetric mean field dynamos by the large scale Lorentz force
Barker D.M., Moss D. 1009

Radiation from a relativistic rotating magnetic dipole: magnetic synchrotron effect
Belinsky V., De Paolis F., Lee H.W., Ruffini R. 1018

(RN) Corrections to an expression for the oscillator strength of hydrogen
Perrin J.-M. 1025

Instruments, data processing, and computational methods

Image reconstruction by the wavelet transform applied to aperture synthesis
Starck J.-L., Bijaoui A., Lopez B., Perrier C. 349

The gamma-ray burst experiment onboard the SROSS-C satellite
Marar T.M.K., Sharma M.R., Seetha S., Upadhyaya N., Padmini V.N., Umapathy C.N., Prasad N.L., Murthy N.S.R., Sreenivasaiah K.V., Kasturirangan K., Rao U.R. 698

The GI2T interferometer on Plateau de Calern
Mourard D., Tallon-Bosc I., Blazit A., Bonneau D., Merlin G., Morand F., Vakili F., Labeyrie A. 705

Measurement of the atmospheric limit to narrow-angle interferometric astrometry using the Mark III stellar interferometer
Colavita M.M. 1027

Procedures for the interactive analysis of point sources from the ROSAT XRT/PSPC All-Sky Survey
Belloni T., Hasinger G., Izzo C. 1037

Diffusion effect on the dynamo action at high order approximation
Carvalho J.C. 1046

Thermal effects on the pointing of the 32-m MERLIN radio telescope at Cambridge
Bayley A.M., Davis R.J., Haggis J.S., Kärcher H. 1051

Abstracts of articles which have been published in A. & A. Suppl. Ser. 103, No. 3

Global properties of dwarf galaxies. I. Galaxy sample and IRAS infrared flux-densities
Melisse J.P.M., Israel F.P. 714

Chromospheric activity in G and K giants: the spectroscopic data base
Strassmeier K.G. 714

The second Quito astrolabe catalogue
Kolesnik Y.B., Davila H. 714

High-resolution optical spectroscopy of the hot R CrB star V 348 Sagittarii
Leuenhagen U., Heber U., Jeffery C.S. 714

StarWords. A database of abbreviations, acronyms, and symbols in astronomy, space sciences, and related fields (Announcement of a database)
Albrecht M.A., Heck A. 715

StarGates. A database of astronomy, space sciences, and related organizations of the world (Announcement of a database)
Albrecht M.A., Heck A. 715

Parameters of stellar disks from CCD surface photometry of edge-on galaxies
Barteldrees A., Dettmar R.-J. 715

IRAS sources beyond the solar circle. IV. Maps of far-outer Galaxy molecular clouds
Brand J., Wouterloot J.G.A. 715

The Arcetri catalogue of H_2O maser sources update
Brand J., Cesaroni R., Caselli P., Catarzi M., Codella C., Comoretto G., Curioni G.P., Curioni P., Di Franco S., Felli M., Giovanardi C., Olmi L., Palagi F., Palla F., Panella D., Pareschi G., Rossi E., Speroni N., Tofani G. 716

UBVRI photoelectric photometry of bright southern early-type galaxies
Poulain P., Nieto J.-L. 716

Erratum Double star measurements made at Nice *(Text in French)*
Muller P. 716

Preview of accepted papers (February 1994) 1058
